Note: Periodate chemistry is complicated - see Cotton & Wilkinson [17720]. The acid H+1_IO4-1 is strong and it rapidly forms a series of hydrated species based on H+1(5)_IO6-5, rarely distinguished in nomenclature. Microcrystalline HIO₄ (call Periodic acid) can be made.

Note: Periodate chemistry is complicated - see Cotton & Wilkinson [17720]. The acid H+1_IO4-1 is strong and it rapidly forms a series of hydrated species based on H+1(5)_IO6-5, rarely distinguished in nomenclature. Microcrystalline HIO4 (call

Periodic acid) can be made. Results from Salomaa et al. [69SHV_288] generally seem sound but, for now. and for various reasons, it seems electrochem. wins
